¿Qué son los Empavonados?

Los empavonados también llamados esmerilado o arenado es un adhesivo especial con filtro UV para laminar los vidrios internos o externos de oficinas, departamentos, puertas, ventanales, ventanas, mamparas, entradas de edificio, incluso en shower door.

Estos pueden ser lisos o con diseño troquelados, incluso impresos. Podemos troquelar logos corporativos, textos, líneas, rayas, flores o diseños personalizados.

Además de ser una opción útil y decorativa, otorga seguridad para evitar golpes con los ventanales o puertas y también otorga privacidad sin quitar la luz.

El valor de los empavonados dependen del tamaño, si es que es con o sin diseño, depende de la complejidad del diseño, etc.

Tenemos dos tipos de empavonado: gris y blanco, este último sólo recomendamos utilizarlo en liso, ya que este es más grueso y no funciona para troquelarlo con algún diseño. También podemos imprimir empavonado con diseños, imágenes o logos.

Si quieres cotizar envíanos las medidas especificando si lo quieres con o sin diseño, con o sin instalación, dirección, etc. a contacto@decoempavonados.cl.

Instalación

También ofrecemos el servicio de instalación, para esto requerimos la dirección exacta y saber si necesitamos llevar escalera, retirar empavonado anterior, etc.

El día de la instalación los vidrios **deben estar limpios**. Esto es muy importante ya que cualquier impureza o suciedad quedará debajo del empavonado que una vez instalado será imposible de retirar.

****Este catálogo contiene montajes, en la realidad los tamaños, diseño y color en el resultado podría variar****

**Más detalles sobre una óptima instalación
o cotización en nuestra web.**
